## **Summary**

I am an individual with a broad range of interests and talents. I not only have a strong analytical mind, but I am also highly creative and enjoy working with people. I am achievement-oriented and a hard worker. Through the completion of a BA degree and a Postgraduate Certificate in Education, I have developed both my creative thinking skills and people skills. The BSc IT degree which I will be finishing this year, has equipped me with the analytical skills required for software programming. This combination of creative and analytical thinking skills will enable me to complete the BIS(Hons) in Multimedia successfully.

---
